

The Living Room

by Adsideo:

Has been made available in order to provide a "3rd place" for our neighbors living in the Sellwood/West Moreland area.

Our desire is to cultivate **healthy discussion, relational cohesiveness, social responsibility, and community awareness.**

We believe that every neighborhood needs a place that encourages and promotes "face-to-face" encounters.

We do value the interconnectivity that one can experience through various forms of technology, however, we believe that people need to participate in discussions that require **relational investment.**

This is an investment that cannot be experienced through a keyboard or multimedia, but can only be accomplished through relational presence. In essence, we want to encourage our neighbors to come out of their homes and encounter the **beauty of affiliation.**

For many living in our society the home represents a deprivation that starves them of social interaction. If we want our neighborhoods and communities to find harmony, then we must encourage one another to participate in conversations that promote a **greater social awareness** and develop a resurgence of **vested responsibility and interest.**

We shall continue to invest in seeking out ways to **advocate, unite and foster healthy gatherings** in our neighborhood as we seek the **greater good.**

Peace,
The Community of Adsideo
